Projects

GOURMET SHOP (Fullstack)

An online store project for Gourmet products, built using Next.js. It presents a rich interface for both desktop and mobile users. Still under construction.

MOTION SNEAKERS (Fullstack)

An online sneaker store built with React, fetching data through a Node-based API. Users can register and make purchases.

ANGRY MATCH (Front-End)

A memory game where you can choose the theme of your cards. Built with React, it fetches images from an external API.
